

Advantages of Q-Chew™

Over Other Coenzyme Q₁₀ Supplements

From the company that brought us the first triple-strength QGel® technology

1. Q-Chew™ is formulated with patent pending Hydro-Q-Sorb® - a revolutionary complex of 100% natural all-trans Coenzyme Q₁₀ with gamma cyclodextrin (a food approved GRAS ingredient).
2. Hydro-Q-Sorb® enhances the bioavailability of CoQ₁₀ several fold. Caco2 cell culture studies prove the efficacy of this unique CoQ₁₀ complex. Animal studies have further confirmed these findings. Additional studies are underway.

* Please note, regular CoQ₁₀ has an absorption rate of only about 10%. Tablets, dry capsules, and even oil based capsules (softgels) were tested and were shown to deliver similarly low absorption rates.
3. Hydro-Q-Sorb® enhances the dissolution of Coenzyme Q₁₀ – making it more easily absorbable.
4. Q-Chew™ is 100% Natural – no artificial ingredients – Period!
5. High Potency Q-Chew™ wafers are being used in pre-clinical trials and are being evaluated for use in clinical trials.
6. Q-Chew™ costs substantially less (approximately half the price) than regular CoQ₁₀ supplements, based on comparing how much gets absorbed.
7. Q-Chew™ is 100% vegetarian and GMO free. No artificial colors, flavors, preservatives, sweeteners, emulsifiers, etc.
8. Q-Chew™ is pleasant tasting (the best tasting brand we have sampled so far), Mildly sweet, natural orange flavored – loved by one and all. During conventions we have to keep doctors from treating it like candy.
9. Developed by the makers of Q-Gel®.
10. Q-Chew™ is very stable through several freeze-thaw cycles. It is also stable in Alaska, Siberia, as well as the Sahara Desert!

Sugar Free - Sweetened with Xylitol
